

## 3 - 18 Months

### **Baby Butterflies Class (3 - 18 months)**

We provide consistent warm and loving care to develop a sense of trust between our babies and caregivers because through this trust they gain the ability to start exploring their environment.

Sensory stimulation (sight, hearing, taste, touch and smell) is a primary responsibility: cuddling, touching and talking to our babies are very important to us. Weather permitting; our babies get to enjoy time out in the fresh air in their own outdoors play area.
